Online Training

Bridge Management & Inspection

July 13 –31, 2020

Online Workshop

Background

This on-line training workshop will cover the main technical issues regarding Road Bridge Management, Inspection and Maintenance. The contents will be based on international standards as well as the hands-on experience of the course instructors. The workshop is addressed at highway agency executives and private sector contractors. The topics of the workshop go from the basic knowledge of Road Bridges and their main characteristics, to the visual inspection activities, until the most up-to-date concepts of Bridge Asset Management.

The lectures will be taught over a three week period with live 1.5 hour on-line sessions held on Monday, Wednesday, and Friday of each week. Upon completion of the training program, the IRF will administer an on-line knowledge test. Participants with a score of 80% of the exam will be awarded with a certificate verifying their successful completion of the course.

Why Online?

- Expert training by professionals for Professionals: access IRF's unique curriculum and lectures developed by world-class specialists
- Accelerated learning processes: get up to speed and gain new insights in less time and with no travel constraints
- Full access to learning materials and session recordings
- Small classrooms & scheduled One-on-One sessions between with instructors
- Self-paced options available
- Interactive group projects and case studies
- Receive IRF Certification

Learning Objectives

- Better understand each of the aspects of Existing Bridge Inventory and Inspection and their related functions
- Recognize the main structural problems of bridges;
- Knowledge of the main techniques of structural investigation and structural monitoring;
- Understand the importance of good bridge inspection practices in order to achieve optimal bridge management target;
- Knowledge of the most up-to-date techniques of bridge inspection;
- Learn about bridge management optimization and tools for resource allocation;
- Understand bridge predictive maintenance and its possible applications.

Schedule

Mondays/Wednesdays/Fridays(1:00 PM– 2:30 PM US EST / 5:00 – 6:30 PM GMT)

WEEK ONE: July 13-17, 2020

**Session 1: July 13
BRIDGE MANAGEMENT DEFINITION AND
CHARACTERISTICS**

Session 1 learning objectives:

- What is Bridge Management and why it is important
- Type of bridges
- Bridge elements

**Session 2: July 15
BRIDGE DESIGN AND VULNERABILITY**

Session 2 learning objectives:

- Main design and construction rules
- Bridge main defects and weaknesses
- Bridge collapses

**Session 3: July 17
EXISTING BRIDGE INVENTORY**

Session 3 learning objectives:

- Bridge inventory standards
- Bridge inventory rules and common practices

WEEK TWO: July 20 – 24, 2020

**Session 4: July 20
DEFECTS AND PATHOLOGY (1)**

Session 4 learning objectives:

- Existing bridge defect classification
- Existing bridge pathologies
- National and international standards

**Session 5: July 22
DEFECTS AND PATHOLOGY (2)**

Session 5 learning objectives:

- How to learn and recognize defects
- Examples and case studies
- Personnel certification

**Session 6: July 24
DIAGNOSTIC TESTS AND STRUCTURAL
MONITORING**

Session 6 learning objectives:

- Main diagnostic tests for bridges
- Main principles of structural monitoring
- Examples

WEEK THREE: July 27 – 31, 2020

**Session 7: July 27
NEW BOUNDARIES IN BRIDGE INSPECTION**

Session 7 learning objectives:

- Limits of standard practices
- New techniques and tools
- Future developments

**Session 8: July 29
BRIDGE ASSET MANAGEMENT**

Session 8 learning objectives:

- Bridge Management System
- Bridge management practices
- Prioritization

**Session 9: July 31
PREDICTIVE MAINTENANCE**

Session 9 learning objectives:

- Management of single bridge
- Management of stock of bridges
- New boundaries and optimal resource allocation

Instructor

Michele Frizzarin is a structural engineer with 15 years experience in the field of analysis and verification of existing structures. In particular he gained expertise in the inspection and structural analysis of existing concrete, steel and masonry infrastructures, as well as historical buildings and monuments. He furthered his education in the study of the dynamic and seismic behavior of structures, and work constantly in universities for the organization of technical courses of construction and structural dynamics.

He is partner and R&D Manager of Franchetti Group, headquartered in Italy, branches in Brazil, Canada, and Expansions from 2020 in USA, India and Singapore. The company operates in the field of civil engineering and environmental engineering with the collaboration of more than 50 engineers.

Registration

- 1,700 USD IRF Members
- 2,000 USD Non IRF Members
- 1,400 USD Group Rate
- 1,000 USD IFIs, US State DOTs & City Officials

Target Audience

- Road & Bridge Authorities & Operators
- Bridge Design Consultants
- Bridge Program Managers
- Bridge Management Engineers
- Bridge Preservation & Maintenance Engineers
- Bridge Inspectors
- Bridge Designers
- Transportation Planners
- Transportation Asset Management Team Members

System Requirements

Computer Requirements

Operating System

Windows 7 - Windows 10, Mac OS X 10.9 (Mavericks), macOS Catalina (10.15), Linux, Google Chrome OS, Android OS 5 (Lollipop) - Android 9 (Pie), iOS 10 - iOS 12, Windows Phone 8+, Windows 8RT+

Web browser

Google Chrome (most recent 2 versions)

Mozilla Firefox (most recent 2 versions)

Internet Explorer v11 (with Adobe Flash if running Windows 7)

Apple Safari (most recent 2 versions)

Microsoft Edge (most recent 2 versions)

Internet connection

1 Mbps or better (broadband recommended)

Hardware

2GB of RAM (minimum), 4GB or more of RAM (recommended)

Microphone and speakers (USB headset recommended)
