Road User Charging
Electronic Toll Collection
Dubai, UAE
December 6-8, 2020
Workshop
Background

Tolling related technologies have made tremendous progress over the past decade, and today developing and implementing a nationwide solution presents fewer technological risks than was the case 10-15 years ago. Nevertheless, Capital & Operational Expenditures remain a significant hurdle for many road agencies. It is therefore essential for decision-makers to carefully consider the system they want to have in place prior to large-scale investment.

Learning Objectives

✓ Get a current overview of financing and operational models in the road sector
✓ Provide objective and technology-neutral information and knowledge to successfully introduce an eTolling scheme for trucks and light vehicles
✓ Provide updated knowledge on possibilities and challenges in Electronic Toll Collection, Road User Charging, Mobility Pricing, eVignette and eTolling segments
✓ Identify the most critical points and risks to overcome in developing a tolling scheme
✓ Learn how to migrate existing plaza-based / cash-based toll collection into free flow, noncash mode of operation
✓ Understand the constraints and benefits raised by regulatory regimes applicable to setting tariffs
✓ Present methodologies applied by governments which were successful and illustrate the content with real business cases from around the world.

Target Audience

• National & State Public Officials and other Regional Transportation Authorities
• Road and Transport Authorities / Agencies
• Road and Toll Operators
• Private Consultants & Contractors
• Infrastructure Developers
• Infrastructure Funds / Financial Institutions
• Senior Financial & Legal Advisors, Technical Advisors, Insurers, Modelers
• Research Institutes
• Transport Research Academia
Format

How we’ll work together during the course:
• Structured elements for each day, with established timeframes, within a productive learning environment
• Course consists of classroom learning, collaborative group activities, individual learning opportunities, as well as nominated presentation sessions
• Ample opportunity to share ideas, discuss challenges and create solutions and a better way forward together

Venue & Registrations

Ministry of Infrastructure Development
Al Nahda Street
Dubai, UAE
Registrations at https://www.irf.global/event/etc20-dubai
Rates: US$ 2,500 (Public) / US$ 2,000 (IRF Members)
